DETAILED ACTION

Allowable Subject Matter

1. Claims 17 – 25 (renumbered 1 – 9) are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The present invention of claims 17 - 25 is directed to a method for producing a preview of a video sequence, which includes receiving a stream of video frames; dividing the stream into successive video segments comprising different, respective numbers of the video frames; determining the different respective numbers of the video frames in the successive video segments and processing the successive video segments to identify respective representative frames thereof.

Independent claim 1 identifies the unique distinct feature “receiving a requirement to output the stream with a desired acceleration factor; and in response to the requirement, displaying the respective representative frames for different, respective periods of time that are determined in response to the desired acceleration factor and to the determined different respective numbers of the video frames in the successive video segments.”

The closest prior art, Jun et al (US 2001/0020981) discloses a method for producing a preview of a video sequence, which includes receiving a stream of video frames; dividing the stream into successive video segments comprising different, respective numbers of the video frames; determining the different respective numbers of the video frames in the successive video segments and processing the successive

video segments to identify respective representative frames (figs 4A and 4B and para 0050). However Jun et al fails to anticipate or render the above mentioned underlined limitations obvious.

Hence claim 17 is allowed.

Since claims 18 - 25 are dependent on claim 17, therefore they are also allowed.

Hence claims 17 – 25 are allowed over prior art .
